Voluntary Canned Dog Food Recall: United States

Hill's Pet Nutrition is expanding its voluntary recall of canned dog food products due to elevated levels of Vitamin D. This expansion relates to the same vitamin premix that led to the Jan. 31 voluntary recall. Please review the full list of recalled products below including the additional products added March 20, 2019. Additional information to follow.

Find out if your products are affected [in the list below](#).

We are extending our Consumer Affairs hours this weekend.

Hill's Pet Nutrition Expands Voluntary Recall of Select Canned Dog Food for Elevated Vitamin D

Update March 20, 6:00 pm CDT:

(Topeka, Kan) Hill's Pet Nutrition today announced it is expanding its recall of select canned dog food products due to elevated levels of vitamin D. This recall expansion was caused by the same vitamin premix received from a U.S. supplier that was the source of the January 31, 2019, recall and is being conducted in cooperation with the U.S. Food and Drug Administration.

While vitamin D is an essential nutrient for dogs, ingestion of elevated levels can lead to potential health issues depending on the level of vitamin D and the length of exposure, and dogs may exhibit symptoms such as vomiting, loss of appetite, increased thirst, increased urination, excessive drooling, and weight loss. When consumed at very high levels, vitamin D can in rare cases lead to potentially life threatening health issues in dogs, including renal dysfunction. Pet parents with dogs who have consumed any of the products listed and are exhibiting any of these signs should contact

cat foods, or treats are affected.

Pet parents in the U.S. who purchased the product with the specific lot/date codes listed should discontinue feeding and dispose of those products immediately or return unopened product to your retailer for a refund. For more information, please [contact Hill's](#) via our website or at 1-800-445-5777.

Impacted products outside of the United States will be subject to separate notices on the country-specific website. If you are outside of the United States, please check your own country's Hill's website for more information.

Hill's Pet Nutrition learned of the potential for elevated vitamin D levels in some of our canned dog foods after receiving a complaint in the United States about a dog exhibiting signs of elevated vitamin D levels. Our investigation confirmed elevated levels of vitamin D due to a supplier error.

Following that recall, we conducted a detailed review of all canned dog foods potentially impacted by the vitamin premix with elevated levels of vitamin D. This review included: analyzing consumer complaints; reviewing veterinarian medical consultations; auditing our supplier; and reviewing our own manufacturing and quality procedures. We then did additional product testing to ensure we had taken all appropriate action. Our review determined that there were additional products affected by that vitamin premix, and it is for that reason that we are expanding the recall. Hill's has received a limited number of complaints of pet illness related to some of these products.
