Transforming Lives™

Voluntary Canned Dog Food Recall: United States

Hill's Pet Nutrition would like to clarify that a single can date code within an already recalled case of dog food was inadvertently omitted from our recall list. This relates to the same vitamin premix that led to the January 31 voluntary recall. The vast majority of the product was distributed in October and November 2018, the cans were in cases that were recalled in January.

Hill's Pet Nutrition Expands Voluntary Recall of Select Canned Dog Food for Elevated Vitamin D

Archived by [Petful.com](#)
Update March 20, 6:00 pm CDT:

(Topeka, Kan) Hill's Pet Nutrition today announced it is expanding its recall of select canned dog food products due to elevated levels of vitamin D. This recall expansion was caused by the same vitamin premix received from a U.S. supplier that was the source of the January 31, 2019, recall and is being conducted in cooperation with the U.S. Food and Drug Administration.

While vitamin D is an essential nutrient for dogs, ingestion of elevated levels can lead to potential health issues depending on the level of vitamin D and the length of exposure, and dogs may exhibit symptoms such as vomiting, loss of appetite, increased thirst, increased urination, excessive drooling, and weight loss. When consumed at very high levels, vitamin D can in rare cases lead to potentially life threatening health issues in dogs, including renal dysfunction. Pet parents with dogs who

foods were distributed through retail pet stores and veterinary clinics nationwide. **No dry foods, cat foods, or treats are affected.**

Pet parents in the U.S. who purchased the product with the specific lot/date codes listed should discontinue feeding and dispose of those products immediately or return unopened product to your retailer for a refund. For more information, please [contact Hill's](#) via our website or at 1-800-445-5777.

Impacted products outside of the United States will be subject to separate notices on the country-specific website. If you are outside of the United States, please check your own country's Hill's website for more information.

Hill's Pet Nutrition learned of the potential for elevated vitamin D levels in some of our canned dog foods after receiving a complaint in the United States about a dog exhibiting signs of elevated vitamin D levels. Our investigation confirmed elevated levels of vitamin D due to a supplier error.

Following that recall, we conducted a detailed review of all canned dog foods potentially impacted by the vitamin premix with elevated levels of vitamin D. This review included: analyzing consumer complaints; reviewing veterinarian medical consultations; auditing our supplier; and reviewing our own manufacturing and quality procedures. We then did additional product testing to ensure we had taken all appropriate action. Our review determined that there were additional products affected by that vitamin premix, and it is for that reason that we are expanding the recall. Hill's has received a
